Pin Code - 382721

# Company Profile

The Company **LETAP PRINTPACK** was incorporated in the year 1994, about three decades ago, in a humble way with a view of assisting the packing material in the State of Gujarat.

**We have installed world class technology for manufacturing food & pharma cartons at our place.** We are engaged in the manufacturing of packaging material with a proven track record on quality of products & trouble-free performance.

**We are one of the top vendors for the companies that have their products exported to all corners of the world, particularly the markets of Europe & USA.** We have one of the largest capacities for the manufacturing of mono carton's, labels, literature, catch cover etc.

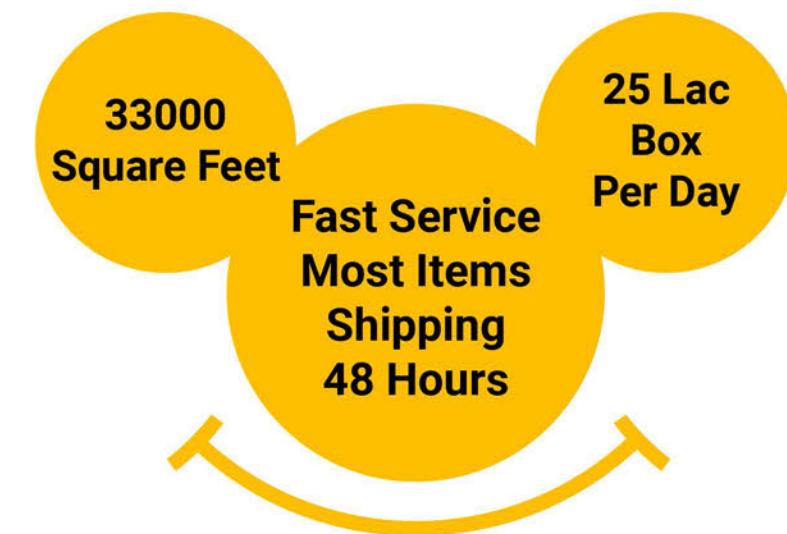

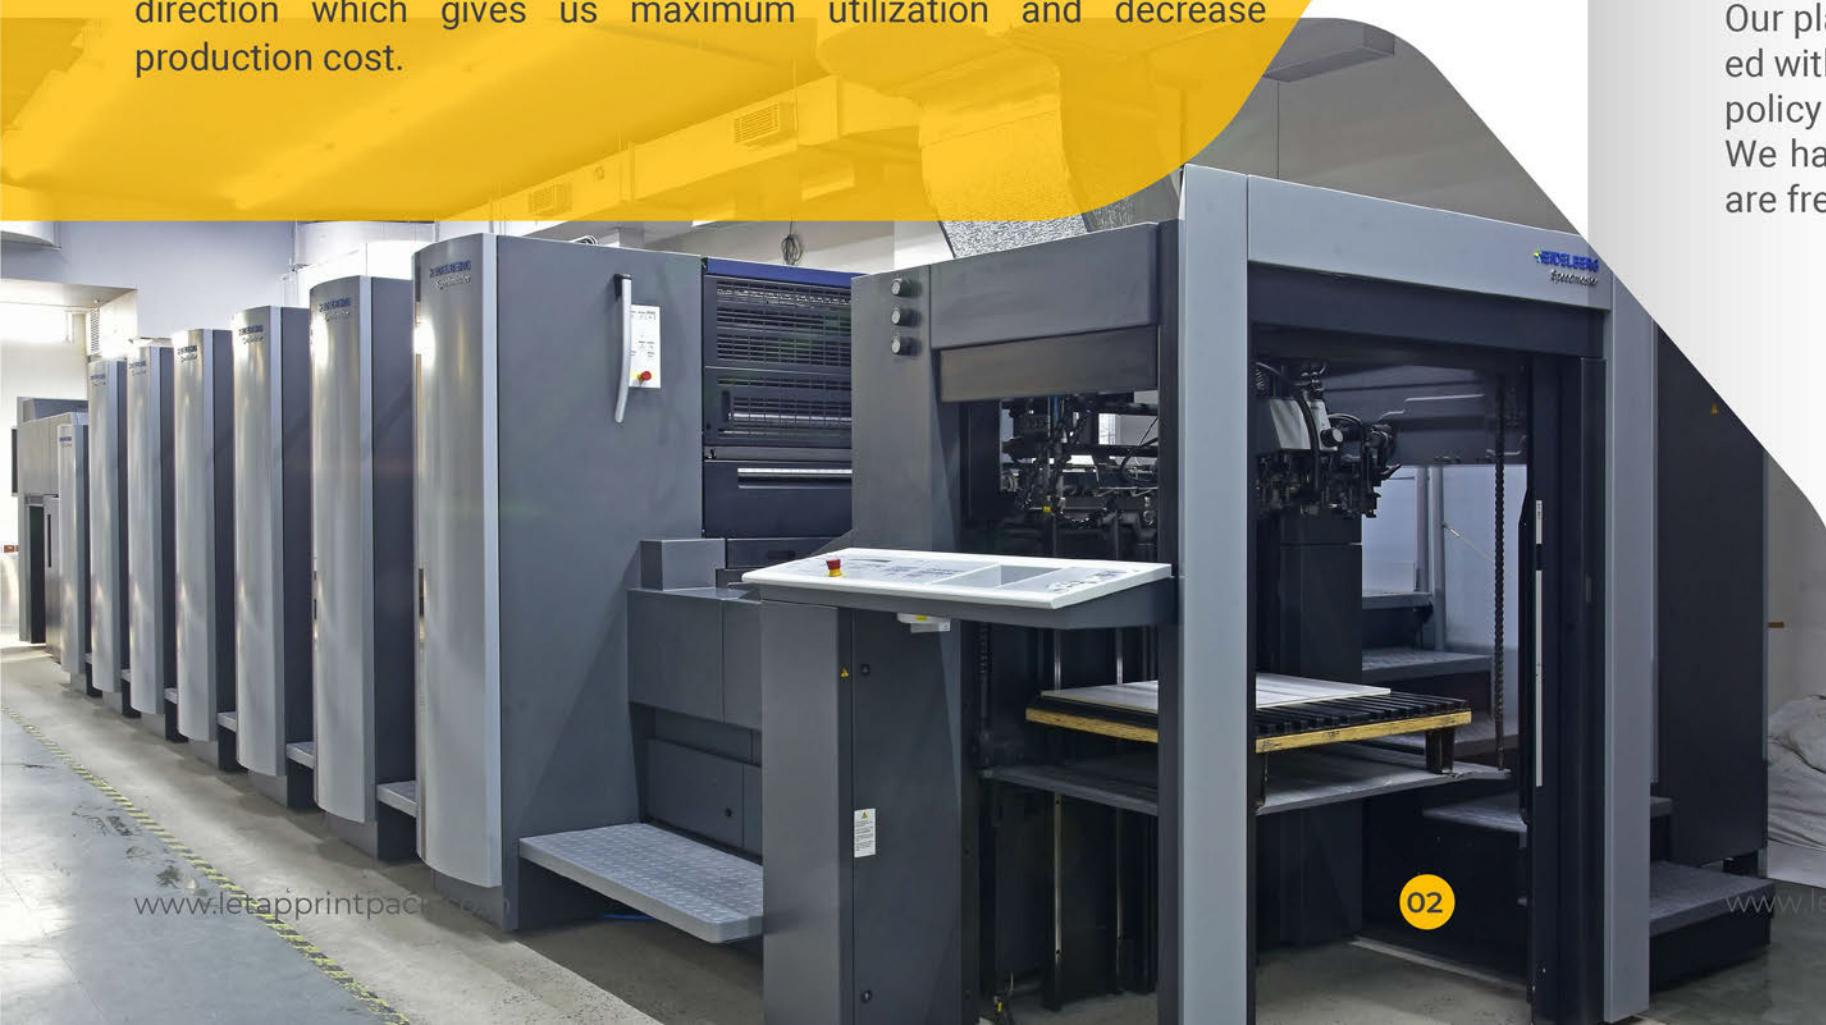

We have strong workforce of qualified and well experienced workers and highly skilled technicians. We are quite competent to meet all the specific requirements of our valued customers with regard to quality and on time delivery. We have young team of production and management professionals who come together to drive in right direction which gives us maximum utilization and decrease production cost.

Factory of the Company at Ahmedabad housed on 33000 sq. feet is fully equipped with all the modern infrastructure facilities that are required for manufacturing of packaging material for food & pharma companies with the ability of 25 lac boxes per day.

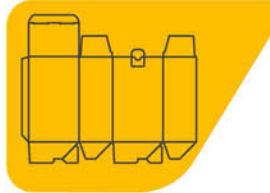

The very important part that we at letap believes in commitment which we have given to our clients.

Our plant fulfils all requirements for food & pharma like changing rooms provided with the facility like handwash, hand dryer, lockers etc. we also include safety policy & training programme before working in the plant area. We have a separate storage area for raw materials & packing materials which are free from insects.

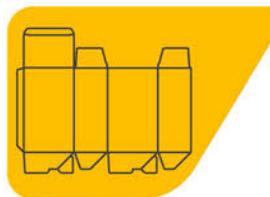

# What we do?

We have complete range of carton styles with wide variety of print finishes such as lamination, aqua coating, U V coating, embossing, window patching, braille, hot foil stamping, met pet, blister coating etc under one shade. We are making all materials like carton's, leaflet, literature, marketing materials and all variety which pharmaceutical company needs. We also have QC department to prove quality works and maintain quality standard.

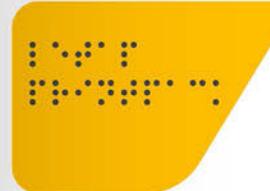

## FOLDING CARTONS

Cartons are versatile packaging boxes made from folding a single sheet of paper board also known as card board that is die cut accordingly to a box template folding cartons are primarily used for lighter product packaging comparing to corrugated packaging.

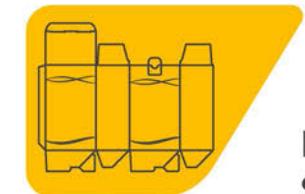

## MET PET CARTONS

The material used for metalized polyester printing has shiny finish, we offer extensive service when it comes to customized met pet laminaton and printing.

## BRAILLE CARTONS

Braille is embossing characters on the cartons, for helps the blind to read. We ensure the cartons meet your own quality standards and adhere to the global braille requirements.

## FOIL STAMPING

Foil stamping is a unique printing process where heat, pressure foil and metal come together to create unique design and optical effects. The foil can be any color, but usually metallic foils like gold and silver are used.

## WINDOW PATCHING CARTONS

Window patching is a technique that applies a thin plastic film to a die cut window on any box or packaging.

Our moto is to satisfy our valuable clients with our service facilities to meet client requirement with quality product, on time delivery, cost effectiveness, value addition. We are getting updated day by day with all the latest standards, technology and equipment according to our client's requirement.

## Man Power
